

## Why Choose ALP® Lockdown Shades?

| <u>Feature</u>                   | <u>ALP® Lockdown Shades</u>                                 | <u>Standard Classroom Shades</u>               |
|----------------------------------|-------------------------------------------------------------|------------------------------------------------|
| Designed for Emergency Lockdowns | ✓ Yes – engineered for rapid deployment and zero visibility | ✗ No – not intended for safety situations      |
| 100% Blackout Fabric             | ✓ Blocks all light and view from outside                    | ⚠ Often partial blackout only                  |
| Fast Deployment                  | ✓ Deploys in 2 seconds or less                              | ✗ May require multiple steps or tools          |
| Custom Sizing Available          | ✓ Made to fit any classroom window                          | ⚠ Limited standard sizes                       |
| Durable and Long-Lasting         | ✓ Built for daily classroom use                             | ⚠ May wear or tear easily                      |
| Easy Installation                | ✓ Installs with basic tools in minutes                      | ⚠ May require drilling or specialized hardware |
| Tested in Real Schools           | ✓ Trusted by districts nationwide                           | ✗ No field testing or endorsements             |
| Meets Safety Guidelines          | ✓ Developed with school safety protocols in mind            | ✗ Not safety-certified or compliant            |
| Made in the USA                  | ✓ Proudly manufactured domestically                         | ✗ Often imported with unknown standards        |
